# György Gutai

hi@gyorgygutai.dev · [Download as PDF](#)

# Full Stack Developer

---

## I do frontend

React, Next.js, TypeScript, Material UI, Tailwind, Storybook, micro-frontends, design systems

## I do backend

Node.js, NestJS, REST APIs, GraphQL, OpenAPI specs, SQL, Headless CMS, WordPress

## I do AI

Agent orchestration, context engineering, agent skill design, GPU cloud infra (RunPod, [Vast.ai](#)), serverless inference deployment (RunPod Flash), generative image & video

## I do ops & tooling

GitHub Actions, CI/CD pipelines, Docker, Cloudflare, webhooks & automation, VPS deployment

---

## My History

### [BBPro at Biznisz Boyz Podcast](#)

**2025.09**

- Migrated business-critical automations to n8n, eliminating manual processes and improving reliability and transparency
  - Empowered client self-sufficiency by providing technical guidance for AI-assisted development and implementing supporting infrastructure
  - Adopted Model Context Protocol (MCP) to enhance development tooling and AI integration
  - Scaled WordPress infrastructure for increased traffic, achieving 36x performance improvement and 45% memory reduction
  - Technologies: n8n, MCP, WordPress, PHP, REST
- 

### MBH Vault

**2024.12 — 2025.08**

- (8-month contract) Key contributor to a new external team that was responsible for rolling out two new major features for Hungary's largest bank

- Developed new frontend features across multiple micro-frontends in a Next.js federated architecture
  - Contributed to the design and development of new subgraphs for the GraphQL Federation, built new NestJS microservices
  - Worked daily with Camunda flow engine integration, performing testing, debugging, and coordinating with internal teams to ensure process reliability
  - Leveraged AI tools to accelerate project discovery, significantly supporting the onboarding of our new team
  - Technologies: React Next.js Module Federation GraphQL Federated GraphQL NestJS TypeScript Storybook Camunda GitLab GitHub Copilot
- 

## **Fuse Oncology at ALLWIN Informatika Kft.**

**2024**

- (2-month contract) Dashboard-style admin interface for radiation oncology targeting the U.S. healthcare market
  - Collaborated with a remote design team on a daily basis to achieve a unified user interface
  - Contributed frontend optimisations and UI best practices to deliver a polished final product
  - Technologies: React Next.js TypeScript React Query Material UI Figma Azure DevOps OpenAPI
- 

## **[BBPro at Biznisz Boyz Podcast](#)**

**2024**

- (Freelance) E-commerce website for one of Hungary's most popular podcasts
  - Led the move from [impulzushirlevel.hu](https://impulzushirlevel.hu) to [bbpro.hu](https://bbpro.hu) as part of a rebranding
  - Drastically improved website performance to increase customer retention and lower hosting costs
  - Technologies: JavaScript HTML CSS MySQL WordPress PHP
- 

## **[Fizz at McKinsey Budapest](#)**

**2023**

- (8-month contract) E-commerce platform for OTP
  - Greatly improved the frontend team's code quality and workflow
  - Implemented end-to-end features in a large SCRUM team
  - Initiated the creation of a design system using Material UI and Storybook
  - Introduced performance load tests using k6 to ensure reliability
  - Technologies: React Next.js TypeScript GraphQL NestJS Material UI Tailwind Storybook k6 Figma GitLab
-

## WCheck at ORMO Kft. | Tegrify Technologies Zrt.

2021 — 2023

- Online sports betting tips aggregator website made for the German market
  - Designed a database structure for large amounts of aggregated betting data
  - Led the development of a Next.js client that displays dynamic reusable components consumed from a Headless CMS
  - Technologies: React Next.js TypeScript GraphQL Strapi Tailwind Storybook GitHub Actions Vercel Heroku Figma
- 

## WELOVETISZATO at We Love Tisza-tó Kft.

2020 — 2024

- (Freelance) Local tourism magazine
  - Achieved exceptional website performance by using a static site generator
  - Built a continuous deployment system that updates thousands of pages in minutes with low computing costs
  - Technologies: React Gatsby Headless WordPress GraphQL WPGraphQL Emotion Styled System GitHub Actions Netlify Vercel AWS S3
- 

## UNICEF Hungary at UNICEF Hungarian National Committee

2020 — 2023

- (Freelance) One of the largest children's rights organizations
  - Supported, maintained and took over the development of a backend system handling online payments and a large WordPress website serving [unicef.hu](https://unicef.hu)
  - Led the development of several full stack features and websites to help UNICEF receive more donations with their campaigns
  - Technologies: JavaScript PHP HTML CSS WordPress MySQL Tailwind Laravel REST APIs Figma
- 

## Tackl at ORMO Kft. | Tegrify Technologies Zrt.

2017 — 2023

- Multi-tenant, multiplayer football betting game
  - Led the development of a single-page application [play.tackl.me](https://play.tackl.me)
  - Developed the game's marketing website
  - Technologies: React Gatsby TypeScript Material UI ProtobufJS Storybook GitHub Actions CircleCI Heroku
-

## Foosio at ORMO Kft. | Tegridy Technologies Zrt.

2013 — 2021

- Multi-tenant, live football manager game
- Led the development of the single-page application
- Storybook design system: [foosio-components.web.app](https://foosio-components.web.app)
- Technologies: React TypeScript GraphQL Material UI Storybook GitHub Actions CircleCI Heroku
